LIFE

We, at SPSU, provide transformative learning which helps students realize their potential, unfold their creative wings and make a meaningful difference in today's world. I am happy to see SPSU move forward and ensuring that students' academic and overall campus experience is excellent.

I congratulate the students and faculty members of the university for bringing out this edition of Elements. This magazine adds fresh perspectives to life and gives us time to 'stand back and stare,' to look at the world through a different lens. It reflects the creative expressions of our students and teachers.

My best wishes for all your endeavours.

VDV Singh

HEAD OPERATIONS, SPSU

I am very delighted to know that despite being affected by COVID pandemic for most part of the academic year, the students with the guidance of the faculty members have successfully come up with the latest edition of the university's magazine, "Elements".

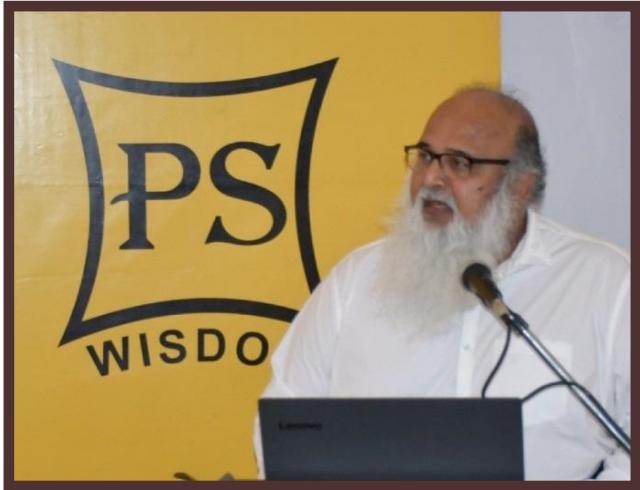

"Elements" reflects the expression of the students on theme of not just "Life" but a whole transformational journey called "LIFE". Apart from the insightful write-ups and heartfelt poems, the pictures of various hues & life forms of nature, the flora & fauna are all very beautifully captured. My heartiest congratulations.

Wishing you all an engaging, eventful, exciting and an experiential learning experience at SPSU Campus.

I would love to see in the next edition, the "Elements" magazine evolve considerably in terms of design, curation, digitalisation and depiction of hues of life on Campus.

Well done. GOD SPEED.

Sanjay Sinha
CAMPUS DIRECTOR, SPSU

The magazine "Elements" is an example of the creativity of our students and faculty. It has captured all the elements of campus, academics, co-curricular and extra-curricular activities during the pandemic. The pandemic has left all of us longing for face to

face interaction. However, our students and faculty established a successful connection that not only ensured the smooth continuation of their studies but also, a camaraderie that assuaged the lack of fun, games and banter the students are missing. We would have appreciated more literary contributions from the students, but their photographic and artwork do tell a very strong story of what they are missing. The quality of Photographs and quips is no doubt an indicator of the immense talent our students would have and had we been working face to face, more of this creativity could have seen its presence in the publication. We are soon opening up the campus for offline activity. The Faculty Editor Dr. Shibani Banerjee has put in tremendous efforts in getting both students and faculty to contribute. My wish today is that once the students come back, the next year's Elements should be led entirely by the students. That for me is the success of not just the faculty but also that of the University.

Elements –The Writers' Club is immensely pleased to bring out the VI edition if the University magazine. The main theme of this edition is 'LIFE': The sub themes revolve around

- (a) Humanity
- (b) Gender Sensitization
- (c) Impact of COVID-19 Pandemic on the education system, family and children

This humble initiative is to encourage our young writers and give wings to their ingenious abilities, imagination and creativity. It unleashes a wide spectrum of creative skills ranging from writing, editing and finally designing the magazine.

Seek opportunities and accept responsibilities. The key to success is hard work and as is rightly said "The heights by great men reached and kept were not attained by sudden flight, but they while their companions slept, were toiling upward in the night". There are no short cuts to success. The long and arduous road of hard work is the only route to success. So my dear friends, gather courage, gear up, have a bright and winning smile and keep moving. That is what life is all about.

We are grateful to the University Management for their immense support and trust in us. Thank you VDV Sir (Head Operations), Sanjay Sinha Sir (Campus Director) and Shrihari Sir (President) without your encouragement and guidance it would not have been possible for us to bring out this magazine. The student editorial team has put in great efforts and their hard work is truly commendable. Last but not the least I take this opportunity to thank all the contributors as their contribution is the reason that makes this magazine endearing to our readers.

Have a splendid reading!!!

HUMANITY

-Shifa Shafat Sheikh, I year B.tech CSE

WHAT SUNSHINE IS TO FLOWERS, SMILES ARE TO HUMANITY. THESE ARE BUT TRIFLES, TO BE SURE; BUT SCATTERED ALONG LIFE'S PATHWAY, THE GOOD THEY DO IS INCONCEIVABLE.

-JOSEPH ADDISON

When we talk about humanity, there can be various perspectives to look at it. The most common way to understand humanity is through this simple definition – the value of kindness and compassion towards other beings. Humans are of different nature, some are cruel and some great people with very helpful nature. The great woman Mother Teresa is the best example of a humanitarian. She spent her whole life with poor kids serving them food and providing them shelter. She looked after the destitute and served humans as a part of her fraternity. For her, the call for duty was of paramount importance and she did go beyond that to help the needy. It is people like her who define humanity.

The amount of divisiveness caused by human-made factors such as religion, race, nationalism, the socio-economic class is causing humanity to disintegrate slowly. Humanity is just not limited to humans. It's also caring for the environment, nature and every living being in this universe. I am sure my thoughts are very relatable to every human being. Be kind to everyone, help others without any selfish motives and if you have been blessed to have enough, do share it with someone. When you make someone smile, that smile brightens your day differently. Humanity comes from the heart, we can't force anyone and one more thing don't let someone influence you in the wrong way, have your own choice

जिंदगी

हर किसी की जिंदगी की अपनी अलग कहानी है
किसने जी ली हंस कर जिंदगी, कितने गम में गुजारी है।
क्यों करते हो इतना चिंतन जिससे दिल में छाई मायूसी है
दह जाते हैं गढ़ के गढ़ फिर भी इतिहास में लिखी कहानी है।
क्यों हार जाते हो जिंदगी से, ये तो बहुत बड़ी बीमारी है
खड़े होकर लड़ना सिखो, अब इतिहास बनाने की हमारी गारी है।

(ALUMNUS)

THE PANDEMIC AND THE CHANGING TIMES

-Dr. Shibani Banerjee- Professor, Dept. of English, SPSU

From the world of real to the world of virtual. From the world of dreams to the world of aspirations. From ignorance to self-realization. From indifference to behaving differently. From being disabled to being special. From being technologically challenged to being technocratic. From compliance to self-reliance. From a voracious reader to an avid gardener. From dependence to exploring new definitions of independence, life has always been a tactful teacher. From black board to white board and finally to the score board. The pandemic has really locked the so called outer world and unlocked the inner world of hope, ambitions and admirations. It has unlocked our talents, opened us to a new way of life and made us think hard about what are we living for?

There has been a forlorn debate on the way the pandemic Covid 19 has affected our lives. It has shown us the optimistic as well as the pessimistic side of life. On a more serious note it has also taught us the real meaning of LIFE that is 'Living in a Frightful Environment'. The ways of God are many and perhaps a bit uncanny as well but they are there to teach us, reprimand us and finally emancipate us. Living each day under the fear of death has shockingly turned us to the path of being humane. It has taught us to take a pause, wait and think about where we are going. But the million dollar question still remains Was it necessary? Is it so crucial?

Yes it is. It is necessary and crucial to understand that our life is precious and we need to think about it more seriously. Of late we have been taking life very casually and in the hustle and bustle of our jobs, work pressure and other things we have been ignoring our loved ones and pursuing the rat race of earning wealth, fame and other materialistic things. The pandemic has taught us the importance of family and also given us a very strong message that life is quite uncertain and we never know what holds the next. So we need to take out some time for our family.

Laugh without any reason, play with kids with utmost honesty, spend some time with our mother, father and partner and let them know that 'we care'. We have also been ignoring our health and again this pandemic has brought to light that our health is integral and we cannot just ignore it. Adopting a healthy life style is now very trendy, going for a walk, yoga, meditation etc. is also in the limelight and people are becoming more sincere and serious towards this. All said and done people have now started becoming more conscious, more sensible and a little more kind towards one's own life. 'Live life as it comes' easier said than done but we really need to do that and live our life by adding some more colours to it. These colours of love, faith, sincerity, hard work, commitment, devotion and empathy will assist us to relieve stress, clear our minds and strengthen our souls. So friends, be happy, be contended, work passionately towards your goal, put in your best, believe in yourself, have faith in God and you will find the future is all yours.

"LIFE IS LIKE RIDING A BICYCLE.
TO KEEP YOUR BALANCE, YOU
MUST KEEP MOVING."

“जिंदगी”

हिम्मत ना हारो - जिंदगी का दूसरा नाम ही हार है,
अपने लक्ष्य को करने की थानो - की कल होनी फिर इक नई शुरुआत है,
तुम बस रंगो में रंग दो जिंदगी के खुद को - की कल फिर बनेगी तुम्हारी इक नई पहचान है।
जी बस अपने हौसलों को इतना बुलंद रखो - की कल सबसे आगे जानी तुम्हारी भी जिंदगी की नाव है।

मोहित चौधरी

LIFE

Life is full of ups and downs

Just like a sentence full of nouns.

Sometimes, it is a picture of melancholy

While sometimes, it smiles at you joyfully.

Life is full of opportunity

So live it with serenity

Accept it as it comes to you

Even when it leaves you black and blue!

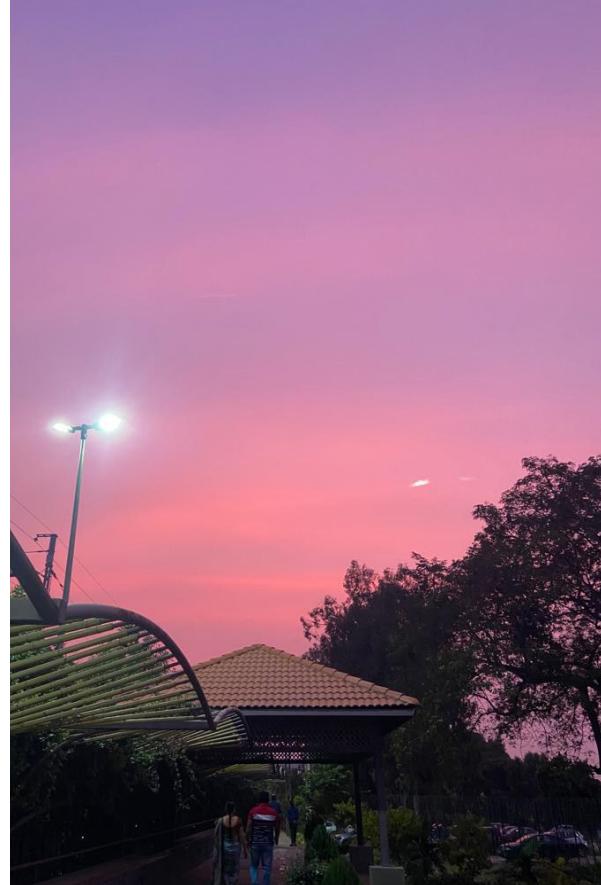

Life is a bouquet of flowers

Beauty, it always showers

In life, never lose heart

And always try to find a new start.

-Disha Vyas, III Year BBA

AARTHI Y (B.TECH, ECE, III YEAR)

Life this word itself is a ocean of emotions comprising of love, fear, excitement, happiness, sorrow and a lot more. Everyone wants to live their life like king size but what does even life means... It is not a object or something to behold onto. It is a gift of nature which is to be appreciated. We face a lot of day to day situations some good, some bad but we have to face it with full confidence and gratitude to have a better tomorrow. Our way of responding to the obstacles and taking them as a challenge rather a burden makes our life better or worthy. This journey of life is full of adventures, many of the times we get to achieve those things we never dreamt of even..and this we call

as miracle but the purpose of life is to cheer us with such surprises to make us understand the value of this ""Life"". Not only happy things sometimes we have to deal with the unfortunate things as well to make up the balance. This is somewhat similar to a wave. As a wave is made of crest and trough similarly life also balances itself with happy and unfortunate experiences but we as a sailor should row and row and take our boat to the destination. In short I would like to define life with a rose plant. Yes it is beautiful but it has thorns in it but the thrones do not undermine its beauty. That's what we all are- a combination of good and bad, sweet and sour, happy and unhappy.

TARANG SRIVAS (B.TECH, ECE(IoT) II YEAR)

ROLE OF A FACULTY DURING THE COVID – 19 PANDEMIC

-DR. ANAND BHASKAR- HEAD, DEPT. OF ELECTRONICS AND COMM.

"Extra hours spend in front of laptops, extra classes, WhatsApp calls and late night group chats: It's the faculty who worked hard, listened, nurtured and cared"

COVID-19, a public health crisis of worldwide importance, was announced by the World Health Organization (WHO) in January 2020 as a new coronavirus disease outbreak and was reported as a pandemic in March 2020. The first cases of COVID-19 in India were reported on January 30, 2020 in three towns of Kerala, among three Indian medical students who had returned from Wuhan, the epicenter of the pandemic. Lockdowns were announced in the whole country on 25 March. University Mid-Term exams were scheduled in the third week of March 2020, I still remember the noise from the boys' hostel the day before the exams, and came to know that exams were cancelled due to COVID-19. At that time I was not aware of its large impact on humanity and

work culture. Due to lockdown it was time to work from home.

Despite the devastating consequences of the pandemic, this global crisis has also been an extraordinary time for learning. Two vital factors have shifted due to the pandemic. Firstly, pedagogical adaptations have proven to be crucial as the traditional lecturing in-person models do not translate to a remote learning environment. No matter the type of channel used (radio, TV, mobile, online platforms, etc.) the faculty had to adapt their practices and be creative to keep students engaged as every household had become a classroom - more often than not - without an environment that supports learning. In our university, faculty transformed the traditional methods of teaching to online learning and adopted the remote learning platform such as Zoom, Moodle and MS-Teams. This offers students to attend online sessions, download lecture notes and to watch recorded videos.

Secondly, the pandemic has recalibrated how faculty should divide their time between teaching, engaging with students, and administrative tasks. In most of the Indian Universities according to a survey published in a research paper, 80% of the faculty did not consider being prepared to teach remotely, 60% were anxious, 35% felt tired, and less than 10% were happy or satisfied. The pandemic has highlighted the need for flexibility and more time for student-faculty interactions. For example, in many universities the faculty were given autonomy to adjust the curriculum, lesson plans, and their time allocation. Our university also provided flexibility to the faculty.

It was tough to connect with the students online as due to bandwidth issues most of the time students' camera was turned off. During COVID-19 the quality education suffered

specially in the practical sessions. It was faculty who worked hard and changed the mode from real to virtual for practical's. It was faculty who listened, nurtured and cared about students' current situation. They are the ones who supported and empathized students in the midst of grief when they learnt about their family members turning COVID positive.

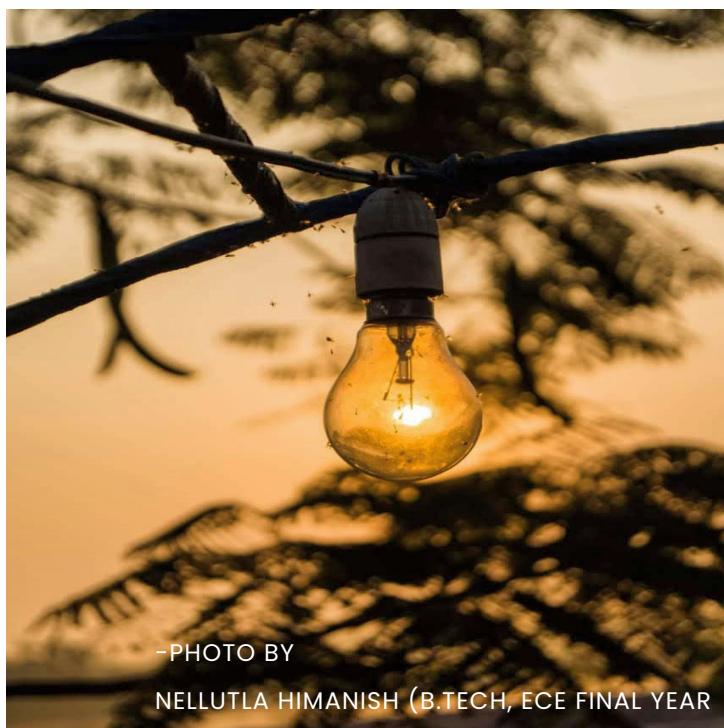

It was faculty who encouraged students not to give up on their future and dreams in the trying times of a parent losing a job or dealing with the very real implications of salary cuts.

It was faculty who found the most effective ways to connect with the students. These are the people who taught the lesson using ICT tools using all possible ways to explain the fundamental concepts. It was faculty who spent hours after the regular day on WhatsApp and other platforms to ensure that student at home received work timely. Extra lessons after a busy day, responding to individual queries and requests from the students, often late night became a part of their routine life. Solving the doubts and helping students keep their focus was the main aim.

These are but some of the sacrifices that were made, often at great cost, both financial and in numerous other ways. Sometimes the emotional and psychological toll was almost too much to bear, but they continued, not complaining or expecting thanks, their exhaustion was all too evident.

Soon, in classrooms, it is faculty who will ensure that the children of the university are as safe as can be, as receptive to learning as possible and that they are provided with an opportunity to succeed. Not for a moment should the tremendous contribution of the faculty should be underestimated or ignored.

Thanks to all the students for the presence and recharging with good internet data packs to support the faculty on the other side of the virtual world.

AN ONLINE MANAGEMENT FEST-TARANG 2021 7-9 JULY 2021

The School of Management, SPSU organised a three-day Management fest-Tarang (7-9 July 2021) in an online mode. Dr. Shweta Lalwani, HOD, School of Management extended a warm welcome to all the dignitaries and the audience. Professor Shrihari Prakash Honwad Vice Chancellor, SPSU in his inaugural address acclaimed the student fraternity for their active participation and stressed the role of co-curricular activities in shaping the personality of an individual. Mr. VDV Singh, Vice President, HR, JK Cement Ltd and Head Operations, SPSU applauded the initiative and encouraged the students to participate more often in such competitions as it contributes to their all-round development and well-being. A good number of students from SPSU as well as from different colleges and Universities across the country participated in the event. Various competitions as Just-a-Minute, Ad-Mad Show and the Talent Show were conducted. The students' participation and performances were commendable and refreshing. The winners for the competitions were:

Just-a-Minute- First- Aadesh Surana- (B.Tech, IV year, SPSU) and Second- Sai Vivek Kondapelly- (B.Tech.,IV year, SPSU)

Ad-Mad show- First- Patlannagari Siri Reddy & Shritha Reddy (B.Tech, I year SPSU) and Second- Vinay Kumar Yadav-SPSU, (B.Tech, IV year,SPSU)

Talent show- First- Mohit Choudhary (B.tech, III year, SPSU) and Second- Aryan Jain (FMS, Mohanlal Sukhadia University, Udaipur)

The student organisers Disha Vyas, Kashish Kalra, Mudit Maharishi, Tarang Srivas and Aatmagya Upadhyay coordinated the entire event successfully. The entertaining, interactive, fun-filled event provided a relief from the mundane and was enjoyed by all.

A screenshot of a video conference interface. At the top, there's a recording notice: "Recording has started. This meeting is being recorded. By joining, you are giving consent for this meeting to be recorded. Privacy policy". The main content area features the Sir Padampat Singhania University logo and the text "SIR PADAMPAT SINGHANIA UNIVERSITY Udaipur, Rajasthan". Below this, it says "TARANG 2021 Event: JAM Session". To the right, there's a grid of participant thumbnails. In the bottom right corner of the main screen, there's a circular icon with "KK" and "+53" indicating more participants. The bottom of the screen shows navigation controls like arrows, a search bar, and a "6 of 18" indicator. The footer includes the text "RANG SRIVAS" and "ELEMENTS".

COUNT YOUR BLESSINGS & STAY POSITIVE

-Dr.Shweta Lalwani, HOD, School of Management, SPSU

For many of us, the COVID-19 pandemic is perhaps the biggest life-changing event that we have faced. This pandemic has caused the shutdown of schools and colleges, cancellations of sporting events, and job losses for many people. The coronavirus has also led to a significant decline in the world's financial markets, decreasing the value of people's investments and retirement funds. COVID is also impacting individuals and families creating feelings of isolation, anxiety, and fear about the future. Looking towards the positive side there is a lot to thank for, and when we are going through these difficult times let's take a few moments to bask in the silver lining and have a look at the mixed blessings which employees in the organization feel are the positives in these tough times.

The gift of resilience, employees believe is an outcome of this crisis. A gift that is as valuable to a business as it is to its employees. Research examined by Harvard Business Review shows that those who are the most intimately exposed to suffering benefit from higher resilience levels, and – specifically for the workforce – the more changes one absorbs, such as layoffs or furloughs, sheltering in place and change in work hours, the more resilient one becomes.

With social distancing the social connections with the help of video conferencing, instant messaging apps, social media etc. enabled virtual collaborations and even virtual happy hours. Thus, maintaining the feelings of social belonging and camaraderie during this tough time. A Boston Consulting Group (BCG) study analysing employee sentiment on workplace changes brought on by Covid-19 found that U.S. employees who reported satisfaction with social connectivity with their colleagues were approximately 3.2 times more likely to say they were as productive or more productive than they were pre-Covid-19.

And last but not the least the Employers are

clearly doing the right things at a time when people need all the positivity and support, they can get by showing their gratitude and care towards the employees, by celebrating small wins, by supporting the families of deceased employees, by connecting with all the employees and spreading a message of their support and care. The blessings are innumerable and the only way to stay positive is to count them and believe this shall too pass.

Closing with a few lines from a song 'Count your blessings' composed by JR Hutson and Johnson Oatman Jr.

DARSHIT KOTHARI (MBA, I YEAR)

When upon life's billows you are tempest-tossed,
When you are discouraged, thinking all is lost,
Count your many blessings, name them one by one,
And it will surprise you what the Lord has done.

Are you ever burdened with a load of care?
Does the cross seem heavy you are called to bear?
Count your many blessings, every doubt will fly,
And you will keep singing as the days go by.

What Really Makes Us Resilient? (hbr.org)

GENDER SENSITIZATION

-ABHIMANYU JAIN, I YEAR, MBA

Gender sensitization precedes Gender Sensitivity which refers to the modification of behaviour by raising awareness of gender equality concerns. This can be achieved by conducting various sensitization campaigns, training centers, workshops, programs etc. Sensitization in the domain of Humanities and Social Sciences is seen as an awareness informed propensity or disposition which aims at changing behaviour so that it is sensitive to certain issues. Gender sensitization may be seen as "the awareness informed disposition or propensity to behave in a manner which is sensitive to gender justice and gender equality issues." It is interlinked with gender empowerment.

In recent times the term 'gender' has become a really sensitive topic to be cared about. With a lot of people all over the world being and doing whom they feel like, a female, a male or non-binary. To be able to understand the term 'gender' we first need to get 1 thing clear: gender is a linguistic term for defining roles that were set in ancient times, for example, Hindi and English have 2 genders while Sanskrit has 3 genders to classify things. Gender should not be confused with 'sex' which is a biological term based on the genes a person has, for example, a male has a set of X and Y chromosomes while a female has a set of X and X chromosomes. The most important thing about gender is that it is fluid. A person can biologically be a male but feel like a female and he has every right to be how he feels about himself. But the question that remains is to consider her/him/them a human first and see things from their point of view.

Gender sensitization theories claim that modification of the behaviour of teachers and parents (etc.) towards children can have a causal effect on gender equality. Gender sensitizing "is about changing behaviour and instilling empathy into the views that we hold about our own and the other genders." It helps people in "examining their personal attitudes and beliefs and questioning the 'realities' they thought they know. Gender Sensitization is one

basic requirement for the normal development of an individual. Without being sensitive to the needs of a particular gender, an individual may refrain from understanding the opposite gender and in some acute cases even him or herself. The need for this sensitivity has been felt and realized through times immemorial and in almost all kinds of human existence, across the globe.

Gender awareness plays an important role in making women and men aware of gender equality and benefits of gender equality and the consequences of gender inequality. When we are gender-aware our attitude, behaviour and beliefs change positively against the inequality between women and men thus contributing to a balanced growth of our society.

NELLUTLA HIMANISH (B.TECH, ECE FINAL YEAR)

क्या है जिन्दगी?

-BHUPENDRA KUMAWAT, I YEAR, MBA

क्या है जिन्दगी?

क्या वो थी जिन्दगी !

जब मैंने पहली बार

अपनी मां के आँखों को

मेरी एक पुकार के लिए रोते हुए देखा था ।

क्या वो थी जिन्दगी !

जब मेरी एक सूरत के लिए

परिवार को आपस में झगड़ते देखा था ।

क्या वो थी जिन्दगी !

जब मां के स्पर्श मात्र से ही

मुझे उनके होने का अहसास हो जाता था,

और मेरी सिसकारियां नींद में बदल जाती थी।

क्या वो थी जिन्दगी जब मां ने मुझे

चलना सिखाया था,

या मेरे पहली बार चलने पर उनकी खुशी से

पूरा घर खिल उठा था।

परंतु जैसे- जैसे मेरी उम्र बढ़ी,

तब-तब ये अहसास हो गया,

कि मां के अश्रु से ज्यादा

पिता का बलिदान थी जिन्दगी।

मेरे पैदा होने पर

जब पूरा परिवार इकट्ठा था,

मानो कोई मेला लगा हो,

परन्तु मेरे पिता का उस वक्त वहां ना होना

आज समझ आता है मुझे ।

सारे खुशी के पलों में

पिता का ना होना,

पता नहीं क्यों खलता है मुझे।

क्यों पिताजी,

मेरे उठने से पहले चले जाते थे ?

और मेरे सोने के बाद ही घर आते थे ?

आज त्यौहार मनाने के लिए पैसे तो बहुत हैं

परन्तु मां-बाप का साया नहीं है।

मां का प्यार जिन्दगी तो हो सकती है

परन्तु पिता का बलिदान,

उनके प्यार करने का तरीका ,

जिन्दगी से कहीं बढ़कर है।

क्या थी जिन्दगी?

मां का प्यार या पिता का बलिदान?

सच कहू तो दोनों का साया थी जिन्दगी।

भूपेंद्र कुमावत, एमबीए, प्रथम वर्ष

हौसला

लड़खड़ाते हैं पग

पर निगाहों में है मेरी मंजिल, इन हौसलों की बुलंदियों का आगाज अभी बाकी है।

अभी तो थामी हैं अंगुली, नापी हैं पग भर झमीन, नन्हे परिंदे
को आस्माँ क्षितिज छूना अभी बाकी है।

पसारने दो पर, लहराने दो इन इठलाती हवाओं में, सितारों के जहाँ में चमकना अभी मेरा बाकी है।

कर यकीन इतना, लहराने दो इन इठलाती हवाओं में, बुलंद कर हौसला, विजयी -पताका का परचम
लहराना अभी बाकी है।

BUT NEVER THINK TO DROP.

-MANJOT KAUR BHATIA, I YEAR, MBA

INAUGURAL CEREMONY OF THE RAINBOW CAREER COUNSELLING CENTER, SPSU ON 22 NOV, 2021

SPSU is a partner to a European Union funded multilateral Project RAINBOW-Realizing Aspirations, Interests and Brilliance of Young Women. The project consortium consists of six partners as FH Joanneum (Austria), Incoma (Spain), University of Jyvaskyla (Finland), BIMTECH, Sir Padampat Singhania University & NIRMA (India). The RAINBOW Career Counselling Centre at SPSU aims to provide career counselling and guidance to young men and women enrolled at the University and conduct activities to promote life skills amongst these students.

Renowned entrepreneur Mr Aakash Sinha- CEO and Founder of Omnipresent Robot Tech Pvt. Ltd and Mrs Jyoti Vashistha Sinha Cofounder and CTO Omnipresent Robot Tech Pvt. Ltd inaugurated the RAINBOW Career Counselling Center, SPSU on 22 November 2021.'

Mr and Mrs Sinha commended the initiative of counselling and capacity building of young women which is the prime objective of the centre. The Project Coordinator, Dr Shweta Lalwani briefed about the project and the objectives of the RAINBOW centre. Professor Shibani Banerjee, RAINBOW Centre Incharge, SPSU delivered the vote of thanks.

THE IEEE DAY CELEBRATION AT SPSU

The IEEE Day was celebrated at Sir Padampat Singhania University on 5th October 2021 with great fanfare. Organized by the IEEE Student branch of SPSU, the event commenced with an inspiring inaugural address by Mr. VDV Singh, Head - Operations wherein he stressed on the need to participate more in such events and also focus on collaborating with students from other institutes.

Prof. Shrihari Prakash Honwad, President, and Prof. Arun Kumar, Dean-SOE also in their address advised the students to take advantage of such platforms and give wings to their creative urges. Dr. Mukesh Kalla, Chair, IEEE-SB, warmly welcomed the distinguished guests and keynote speakers.

The keynote speaker Mr. Vishal Kumar, CEO & Founder, Quantana, Australia, & Digital Manager, Australia India Business Council Ltd., enlightened students about quantum technology and augmented reality. He also shared insights on how to achieve success in life.

The second keynote speaker, Prof. Ajay Agarwal, IIT-Jodhpur & Vice-Chair - IEEE Rajasthan Sub-section educated the students about sensors, IoT, and other cutting edge technologies of today and tomorrow.

The occasion also witnessed the launch of the 2nd newsletter and website of IEEE-SB, SPSU by Mr. VDV Singh. An IDEATHON competition was also organised. A total of 37 teams registered for the event and after screening 17 finally presented their ideas in the competition.

STRENGTH HAS NO GENDER

-KHUSHI GANDHI, I YEAR, B.TECH, MNE

Gender sensitization presides over gender sensitivity the modification of behaviour by raising awareness of gender equality concerns. This can be achieved by conducting various sensitization camps, discussions, webinars, training programmes etc. Women are pushed to be mute spectators in all the above situations living in a hopeless situation. It is time to stop shedding tears for the injustice and get into more civilized and responsible acts like helping women to lead a life with dignity and equality. Provide opportunities to them and empower them so that they play a major role in building a strong nation.

The behaviour of teachers and parents towards children play a very important role in gender equality. Starting of gender sensitization is from our home. It is often said, you are a girl you can't do this and if you are a boy you can do this. Since childhood girls have to play with soft toys as dolls and boys play with guns. When we hear words like caring, loving, sensitive, beautiful, softhearted we think about a girl and if we hear the words fighter, dominant, naughty, brave, violent, leader, we think about a boy. Why is it so? It is because since childhood we have heard many stories and we relate these things to stories or any event and then our thinking converts into stereotypical thinking.

As Shakespeare says "All the world is a stage, and all the men and women merely players." If we play our roles as society wants then we are fit and if we do something that crosses the boundaries set by society then we are unfit for the society or misfit. Society is definitely progressing and girls to are taking up a profession of their choice and we see them as doctors, pilots, engineers surgeons, fighters etc. but when we talk about the daughters' marriage the first thing that is asked is 'Do you know how to cook?' But in boys case, there is nothing like that. In day today life we hear boys like sports and girls like dolls. Boys don't cry but girls are emotional. Boys do have a right to cry and express their feelings. Society should now liberate boys from the 'macho man' image and accept them as human beings, free to express their emotions. Girls don't

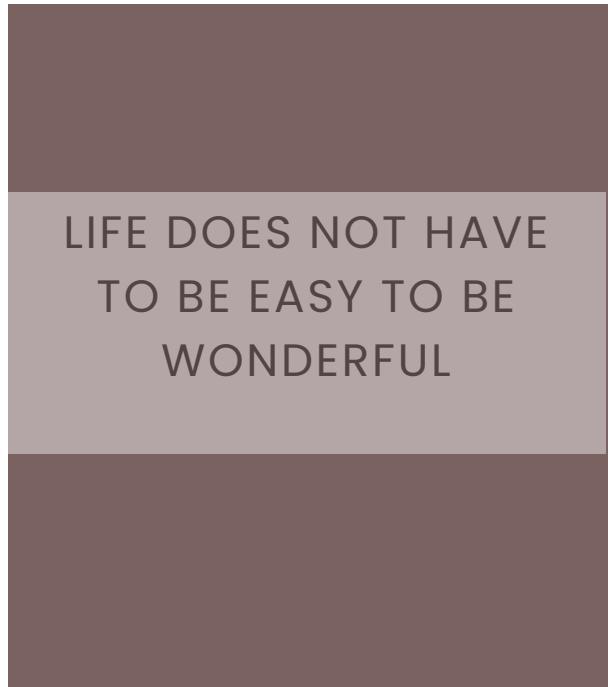

JANAPALA LEHA (B.TECH, CSE FINAL YEAR)

use bad language but boys will be boys, girls don't go out late at night but boys can, boys don't like to cook but girls must know how to cook. Only humans can make these types of rules. God has not inculcated this inequality. Each human being is special and has his or her own qualities. "Strength Has No Gender." It's high time we bridge up the gender gaps and provide equal opportunities to both, boys as well as girls.

LIFE IS PRICELESS

-ASHIKA SHARMA, MBA, I YEAR

Life is a beautiful journey with one destination called death. The journey is a path between life and death. A beautiful life is one where you are happy and accept all yourself in all the circumstances, no matter what others think about you.

We are born, live our life and a series of problems pass away with time. Life is priceless and we should shape our lives with our own rules. It is a chance to achieve whatever you want. Enjoy everything and every moment. Forget all the selfishness at the time when someone needs our help. Be loving and kind to each and every living being on the earth.

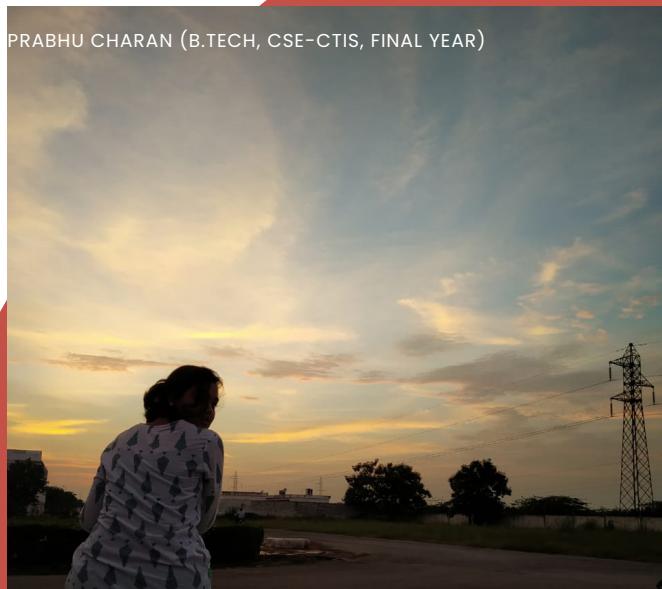

Humanity is not only dependent on money. It is priceless. Taking care of our elder grandfather and grandmother is humanity. Helping our mother with the household chores is humanity. Extending help to old and physically incapable people is humanity. Keeping water and grains on the terrace for birds is humanity. When we understand the meaning of humanity, our purpose in life will automatically attain it.

We all think our problem is bigger than others. When we watch the news we are startled. Some people died in floods, accidents, environmental disasters, attempted suicide for not getting a job or marks, were killed by some others, etc. Their family and around people suffer in their whole life. Does it mean all humans are evil? Our belief in the goodness of people is shaken. Sometimes we are also disappointed by the rules of the government or the organization that is meant to protect our life. We lose our faith and belief.

Our behavior and attitude determine happiness and stress. Everyone has to face struggles and difficult situations. Animals also have trouble finding food and water. We can hardly be compared to an orphan child who lives without a mother and father. Old parents live in old-age homes. Single parent children face the problem of getting an education due to poverty. The list of problems can go on and on. But what matters is finding a solution to it and having the right outlook towards life.

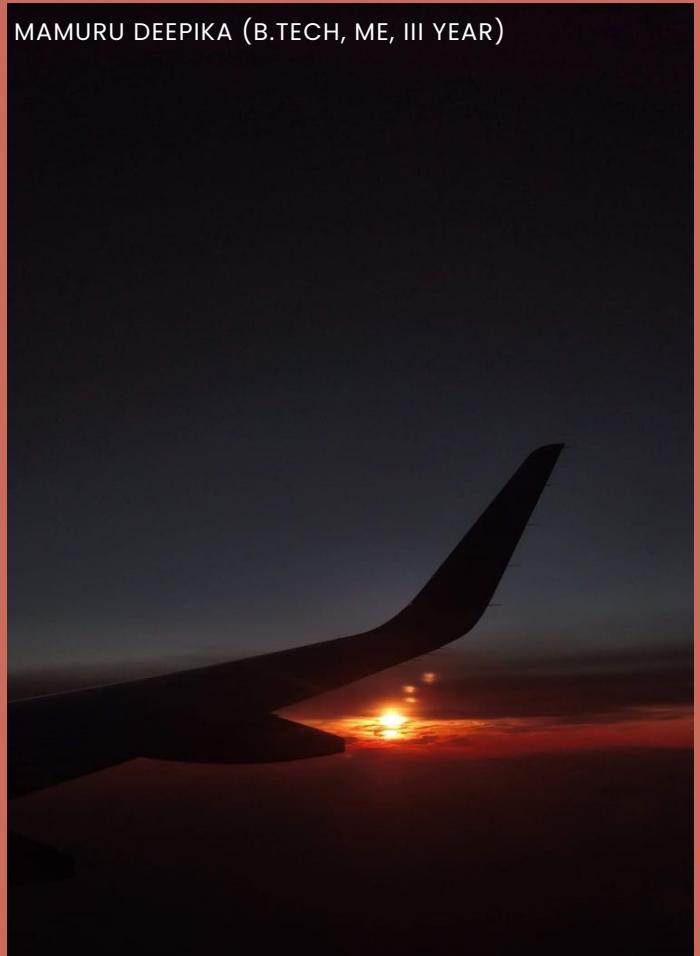

So, life is a journey with full of experiences and learning. We should have a positive attitude towards failure and rejections. There is no meaning in our life without pain and difficulties. The problems are endless but we need to tackle those problems and move ahead in life. In life, the real opportunity is the opportunity to learn. A key point of life is respect. Give respect, get respect. Respect all humans, in any situation whether it is good or bad. There is always a positive thing behind the negative. We learn many things from the negative situation. In life, we perform our role fulfil the purpose of our life and achieve the mission. Times are tough but one day we shall overcome this situation. Life is indeed priceless, do live it to the fullest.

PRETTY LITTLE DETAILS

MAMURU DEEPIKA (B.TECH, ME, III YEAR)

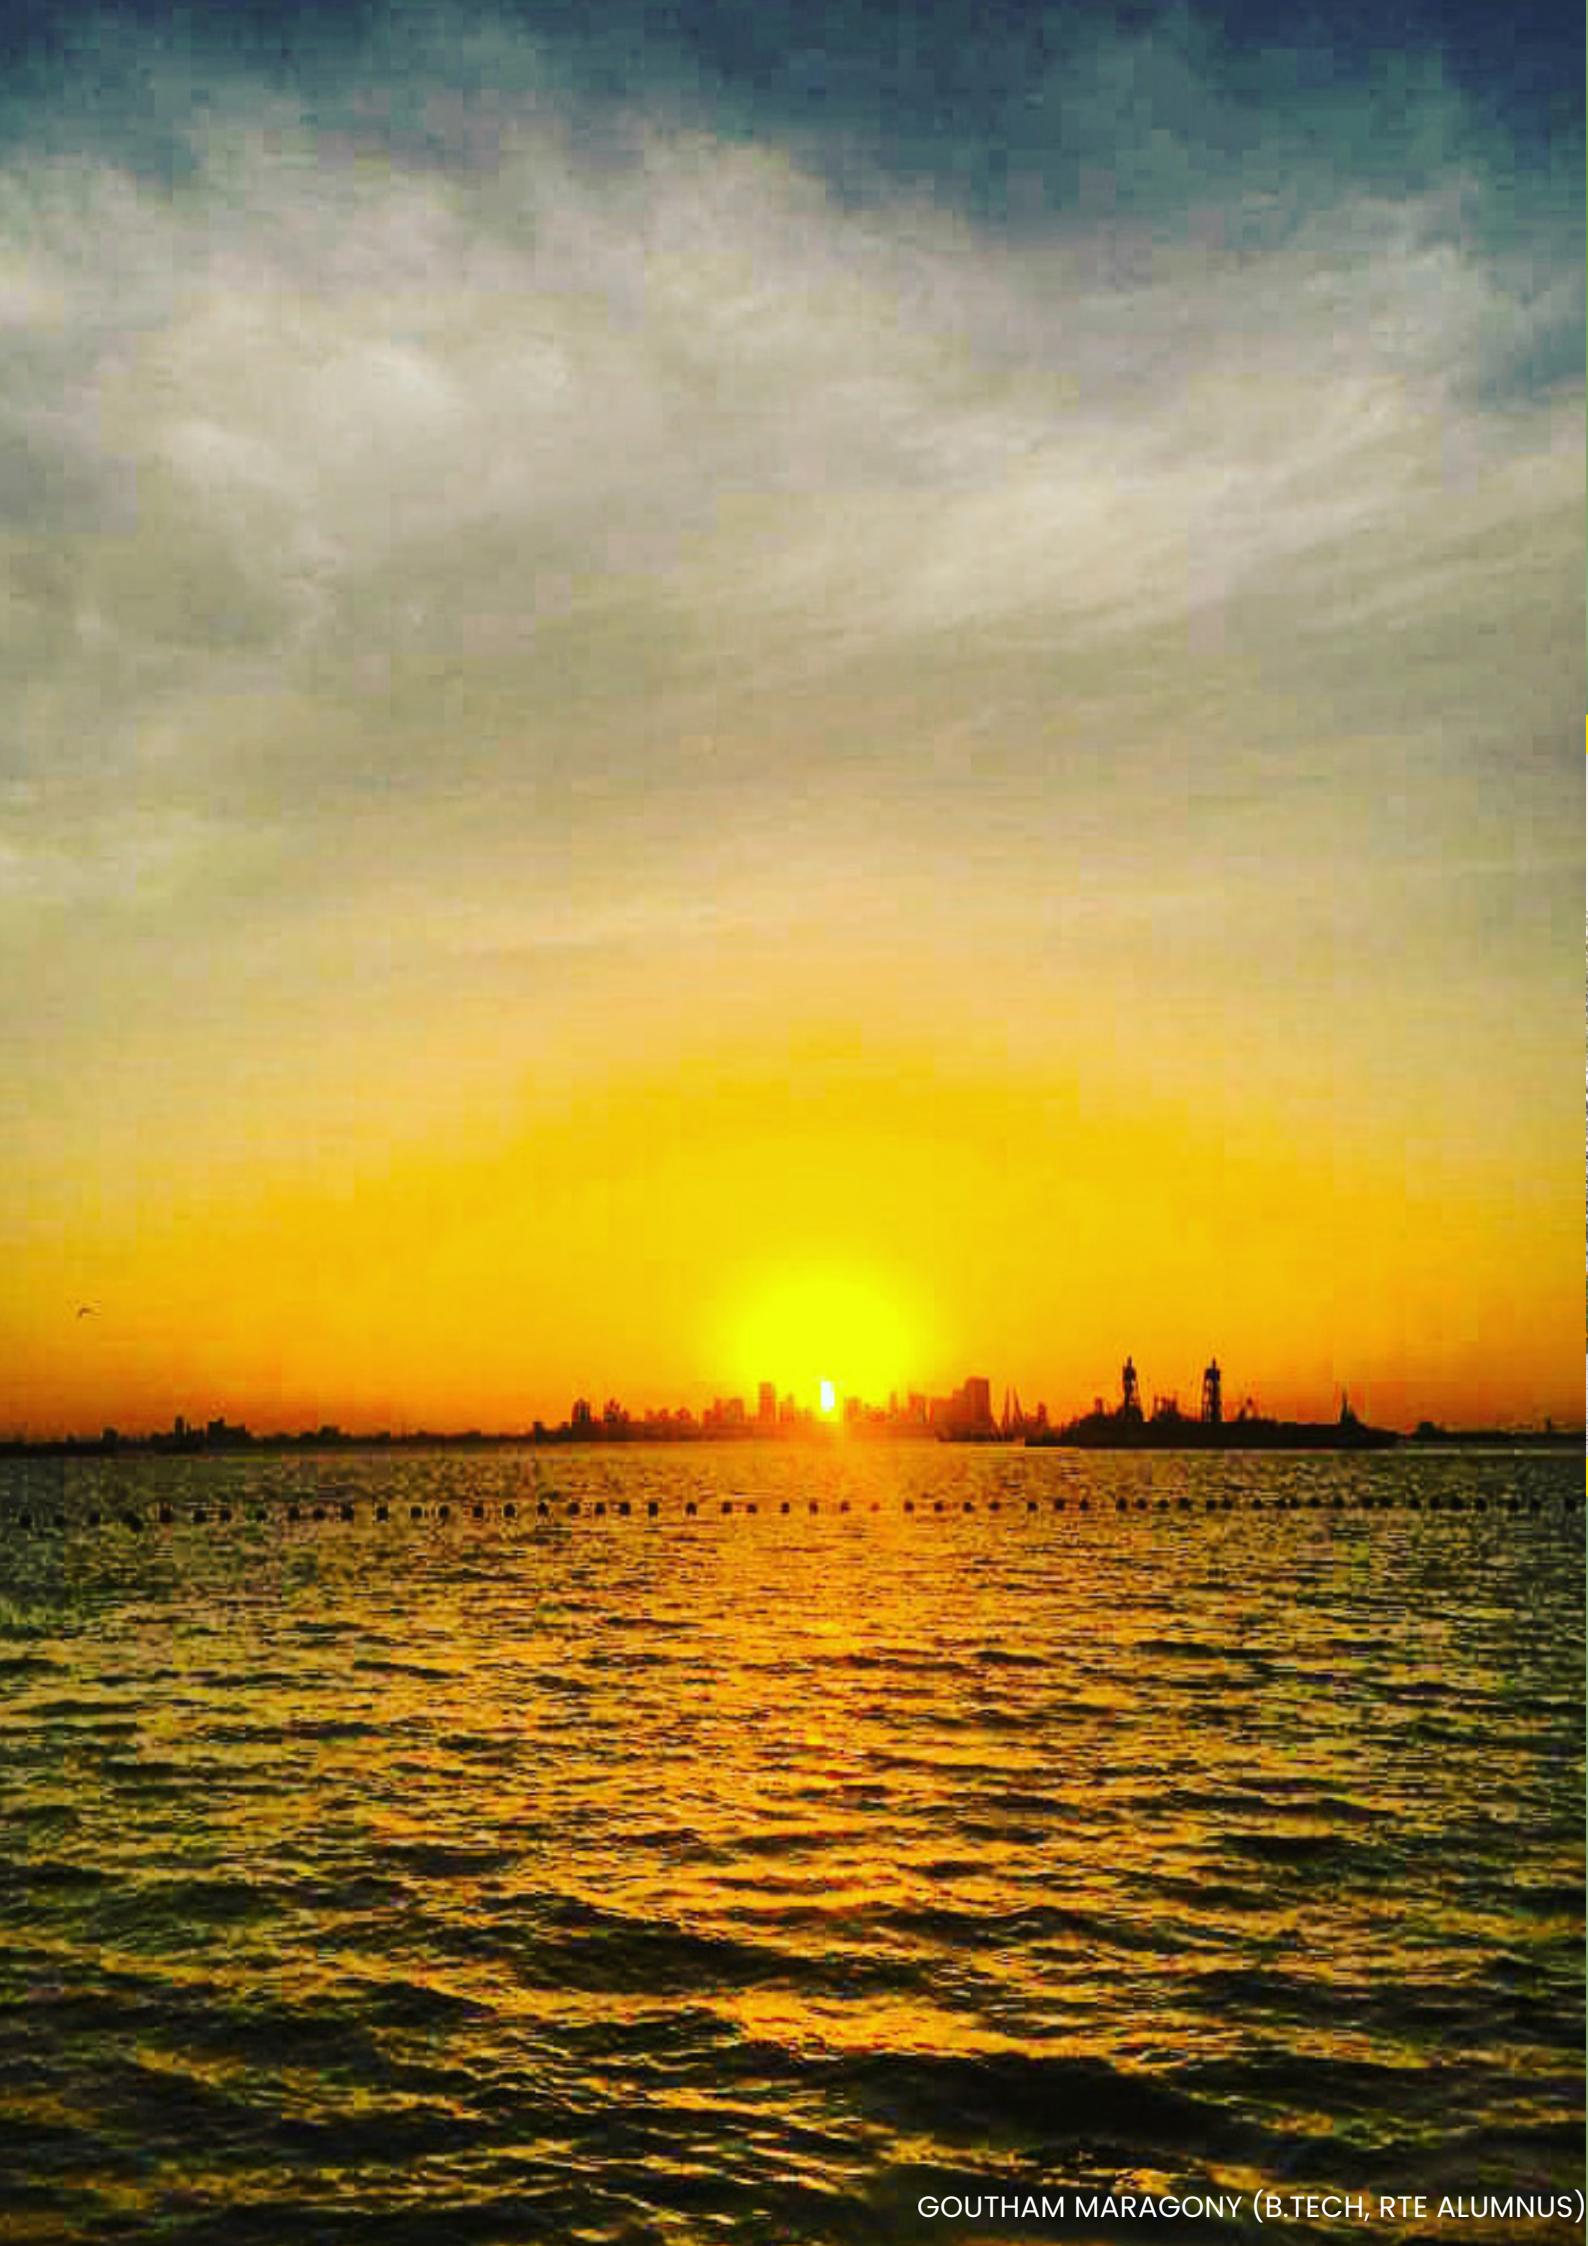

SUNSETS

The sky holds such a lot of obscure magnificence yet we can only glimpse a tiny fraction of it. Clouds are one of the most interesting sights to see in the sky. Every day, I find myself gazing up at the sky and admiring its beauty. Every cloud features a bright side and the glorious sunset is the epitome of transient beauty. The magic of the sky's colours during these periods should not be overlooked because they never look the same.
